

Clean Energy for America's Future

- Welding, Diesel Mechanics programs updated to support bio-fuels industry
- Industry Alliance, Big Sky Bio-Diesel
 - Small scale waterless Reactor established for demonstration, teaching and fuel production comparative analyses
- Soft Skills Training
 - Workforce communications skills, utilizing Dr. Steve Parese “Workin’ It Out” curricula
- Small Business Management Curriculum
 - Enable rural entrepreneurs to start and manage businesses.
- Haz-Mat training in planning process, to support Bio-Fuels production and handling
- Job service alliance for training in soft skills, welding, pipeline welding, safety, computer applications, diesel and general mechanics.
- Engineering Tech program
- Training Trailer
 - Establishing specifications for portable operation for Bio-Diesel Demonstration trailer, (to house current batch plant)
 - Ordering Diesel Pickup to pull demo trailer
 - Determining appropriate trailer for portable lab to include laptops for computer education, welding and plant process control simulators.
- Summer camps planned to introduce students to careers in alternative energy , bio-fuels, wind power and welding opportunities
